

I can't say enough about how great Access Express has been to work with. As an Elementary School Nurse I often run into the dilemma that a student needs to be sent home and families don't have access to transportation. Sometimes the opposite occurs where a student feels better after a few hours in the morning and families are unable to drive them late. Our school is not on the bus line, and as economic times are hitting families hard, this problem is becoming more frequent. After securing a small grant for funding I had to select a transportation company to assist w/ rides when these situations arise. Mike Eddy was so pleasant and helpful by phone, and really seemed to understand the flexible nature of what I was requesting. He has basically set up an on call service where with 10 minutes notice he can send a car to a family's home to pick up a parent, drive them to school to dismiss, and return them home for a VERY fair price. His driver is usually Meredith, his sister who is a sweet, friendly young woman who makes my families feel very safe and comfortable. She has been very compassionate with some kids who were really sick leaving here. They have been so accommodating; each and every time we have called since September they have been able to provide service. Mike was also very flexible with payment, preserving a family's dignity while they are struggling financially was very important to me, with monthly billing no uncomfortable money exchange takes place during the process. This service has been a huge benefit to our school and I would highly recommend them to anyone looking for friendly, reliable, fairly priced service!
